

Mary: "Without you guys I wouldn't be here today. I'm glad I went to a meeting right after discharge. You made me feel good about myself and gave me hope and educated me."

Melissa: The staff made an effort to help everyone based on their individual needs. The groups were very informative. When we left groups each of us had something positive that came out of it. The one-on-one time was a really good blessing for me. When you're having your own struggles, being in a group is so overwhelming. The resources you guys hand out are very good, also."

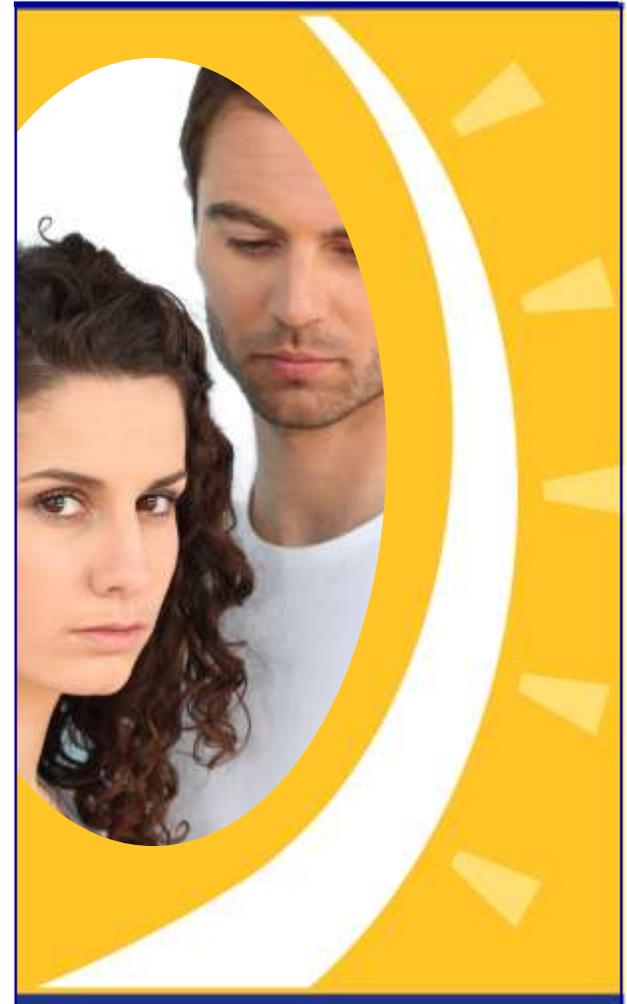

Amanda: "I think that everybody there did a very good job. You all were very great and caring. The classes the Recovery specialist did were really helpful for dealing with triggers and relapse. Dr. Carder is wonderful. The overall experience was great."

James: "What impressed me was the caring and compassionate staff. They always seemed to express a genuine concern for everyone's well-being. ...The staff made it as pleasant an experience as possible, considering the circumstances."

INPATIENT
SUBSTANCE ABUSE
TREATMENT

Why Choose Northeastern Center?

There are three things you should focus on when looking for substance abuse treatment:

1. Program accreditation and licensing
2. Effectiveness of treatment methods
3. Type of aftercare services to prevent relapse.

At Northeastern Center:

- Thousands of adults receive care and treatment from us each year.
- Our program is accredited by The Commission on Accreditation of Rehabilitation Facilities (CARF). We are also licensed by the State of Indiana as a mental health hospital that can treat co-morbid psychiatric and substance use issues.

- Treatment is delivered by a team of professionals representing many disciplines including psychiatrists, nurses, case managers, and recovery specialist. Staff are trained in evidence based best practices for psychiatric and substance abuse.

We provide:

- A low client-staff ratio with approximately 1 staff member per 4 clients. This allows our multi-disciplinary team time to meet the complex needs of each individual.
- A “Home-Like” environment with private rooms and a comfortable setting. This is coupled with a caring and compassionate staff to help you achieve a better outcome.
- Effective “after care” services. Statistics show that the longer an individual is connected to treatment, the greater the chances of maintaining continued abstinence. All clients leaving Inpatient are connected with outpatient, community, and other resources.

- Psycho-education groups are provided to educate individuals on both the basic and advanced concepts of recovery, anger management, relationship dynamics, coping strategies, vocation skills, as well as many other life areas vital to recovery.
